

A Brave New Enterprise

How AI Will Think, Decide & Build With Us

Mohammed Rohim Uddin

Founder & Global CTO, iTCart

Inventor - AiXHub™ EOS

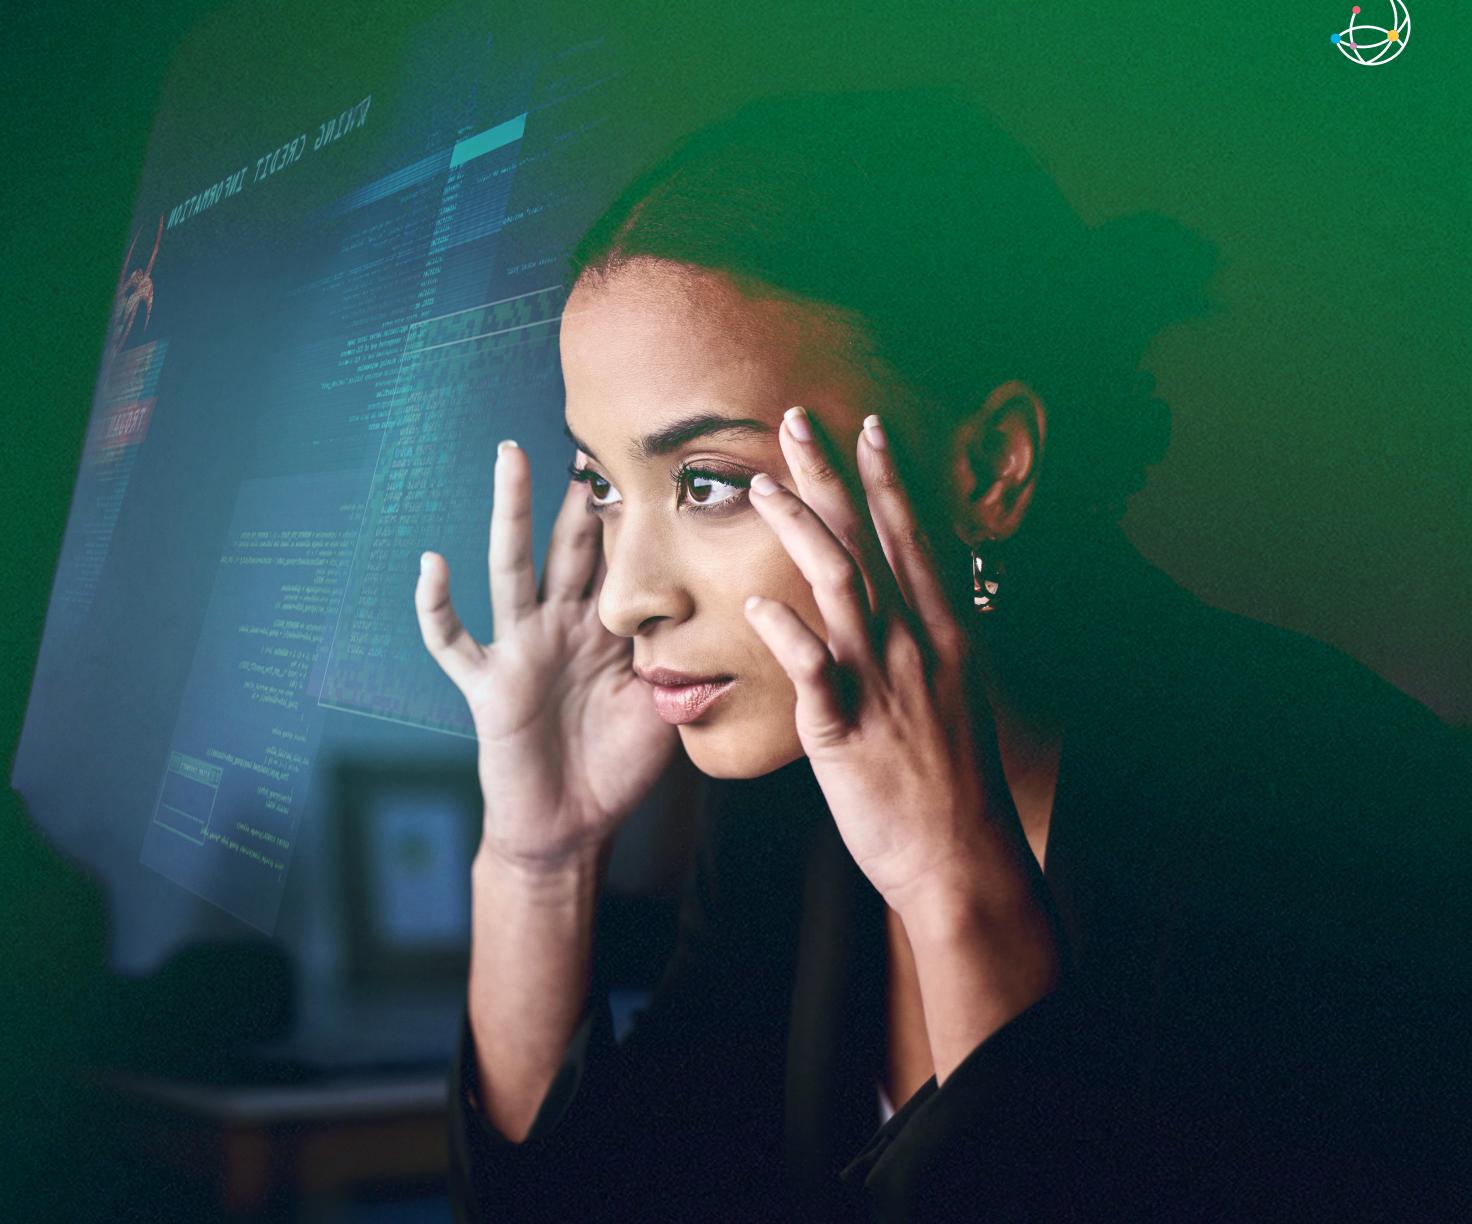

Meet Aisha

This is **Aisha**, Head of Operations.

Last year, her job was simple:
don't let anything break.

This year, her board told her:
'Make us an AI-first company.'

**No one told her
what that means.**

GPTs TPUs Integrations Analytics
Automation AGI Automation
Conversational AI
LLMs RAG Noise Agents LLMs
Data Lakes Agents AI TPUs SLMS
AI Assistants Agents AI GenAI Deep Learning
Knowledge Graphs Responsible AI MLOps AGI
Lots of technology. Very little about outcomes, people, or operating reality.

This is what most AI conversations look like

The Trillion-Dollar Promise

\$15-\$20

Trillion could be added to the global economy by the year 2030

Generative AI alone can add

\$2.6-\$4.4

Trillion annually

So why does it still feel like... chaos?

The AI Adoption Reality

74% of companies struggle to scale AI value

Only **1 in 4** AI projects meet expected ROI

<20% reach enterprise-wide scale

***We don't have an AI technology problem.
We have an AI operating problem.***

For investors and founders, this operating gap is both the risk—and the opportunity.

What We Buy vs What We Need

We obsess over

Models

GPUs

Vendors

Benchmarks

But AI fails because of

People & skills

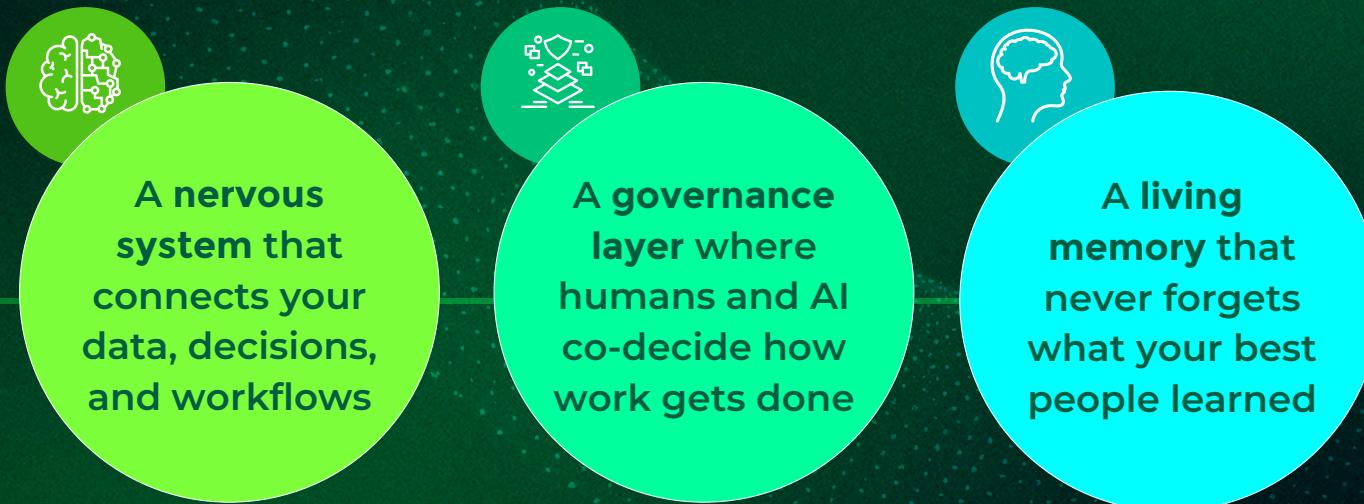

Processes & workflows

Governance, risk & trust

Integration & change management

From AI Projects to an **AI-Native Enterprise Operating System**

Intelligence & Governance Layer
AiXHub™ EOS

Data/Integrations

"ERP · CRM · HR · Sector Systems"

AiXHub™ – AI-Native Enterprise Operating System (EOS)

How an AI-Native Enterprise Thinks

See everything:
operations, risk,
behaviour, context

Connect dots, find
patterns, weigh
trade-offs

Share decisions
between humans and
AI with clear guardrails

Improve with every
project, claim,
incident, or case

01

OBSERVE

02

REASON

03

DECIDE

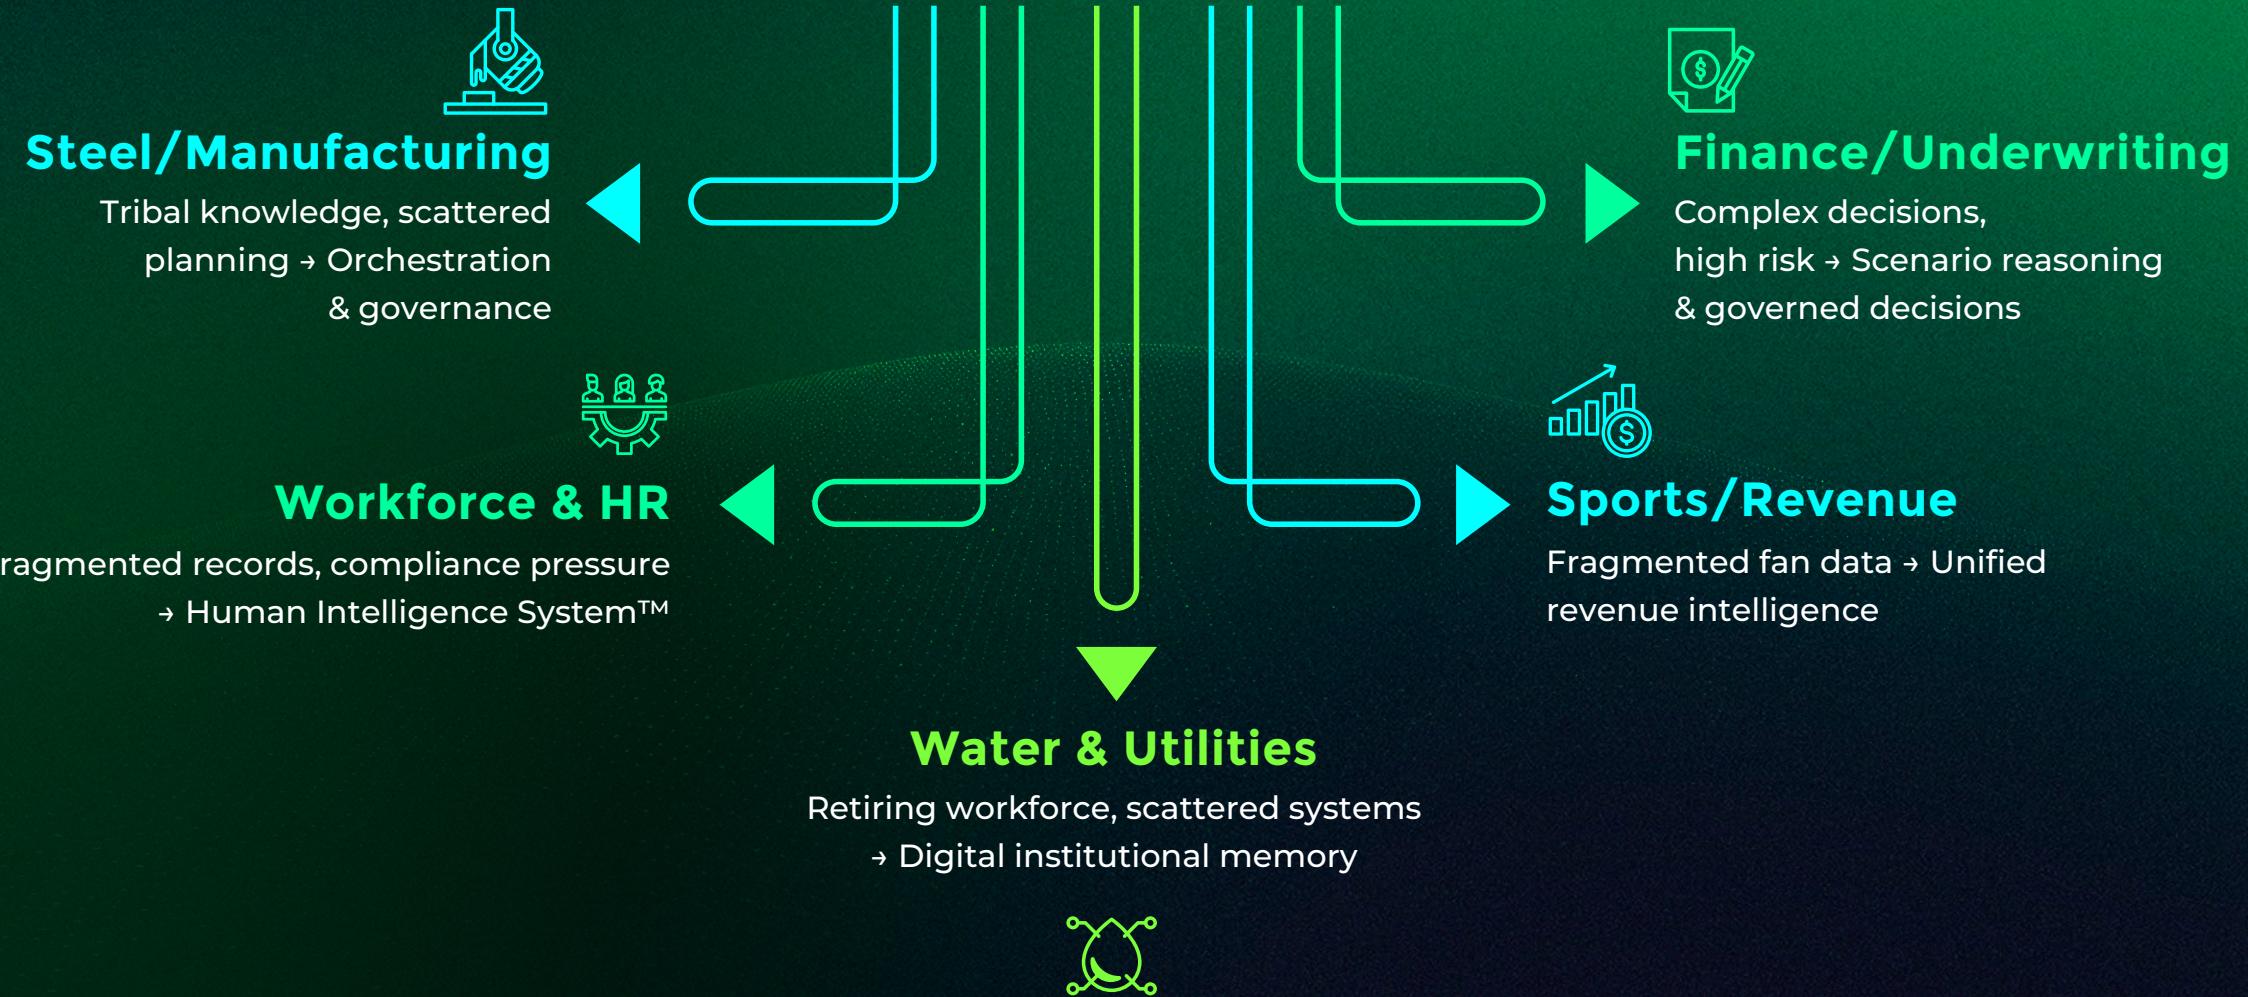

04

LEARN

Different Industries, Same Operating System Pattern

David: The Water Operator (Water & Utilities)

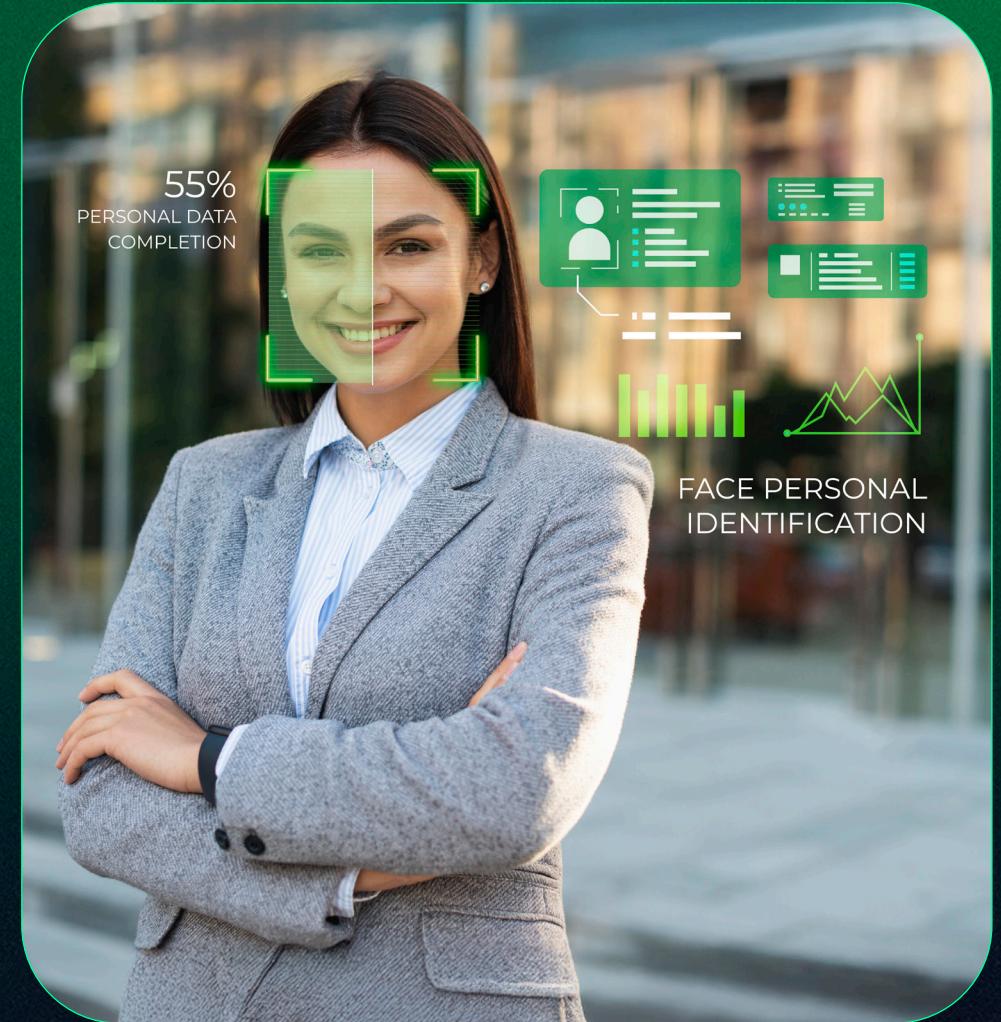

- 30 years of expert intuition, undocumented
- Retirement risk: Knowledge walking out the door
- AiXHub™ EOS captured his "invisible patterns"—turned wisdom into system intelligence
- Outcome: New operators guided by living experience

Sara: The HR Manager (Workforce & HR)

- Juggling 5 disconnected tools, drowning in confusion
- Stressed, afraid of making wrong decisions
- AiXHub™ EOS unified risk signals, audit trail, and recommendations onto one screen
- Outcome: Confident, supported decisions

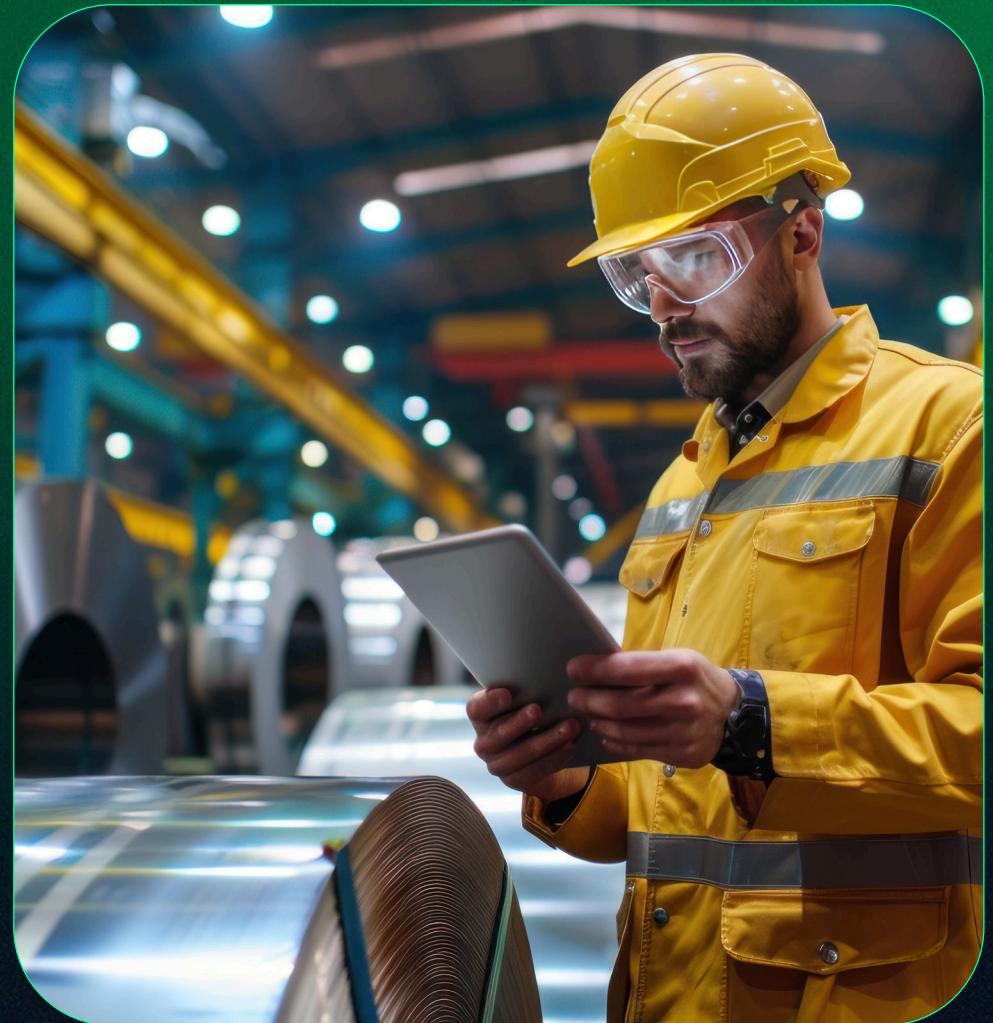

Quinn: The Steel Planner

(Steel/Manufacturing)

- Genius planner, running operations using spreadsheets and instinct
- 10 screens open—high stress, unsustainable
- AiXHub™ EOS empowered real-time machine observations, auto-suggested schedules, bottleneck warnings
- Outcome: Quinn gains superpowers; system turns genius into scalable intelligence

Harbor FC: The Sports Club (Sports/Revenue)

- Fragmented data, decisions in the dark
- AiXHub™ EOS unified all revenue signals—tickets, fans, sponsors
- Shifted from guessing to governing in 90 days
- Outcome: Clear revenue plays, actionable insights

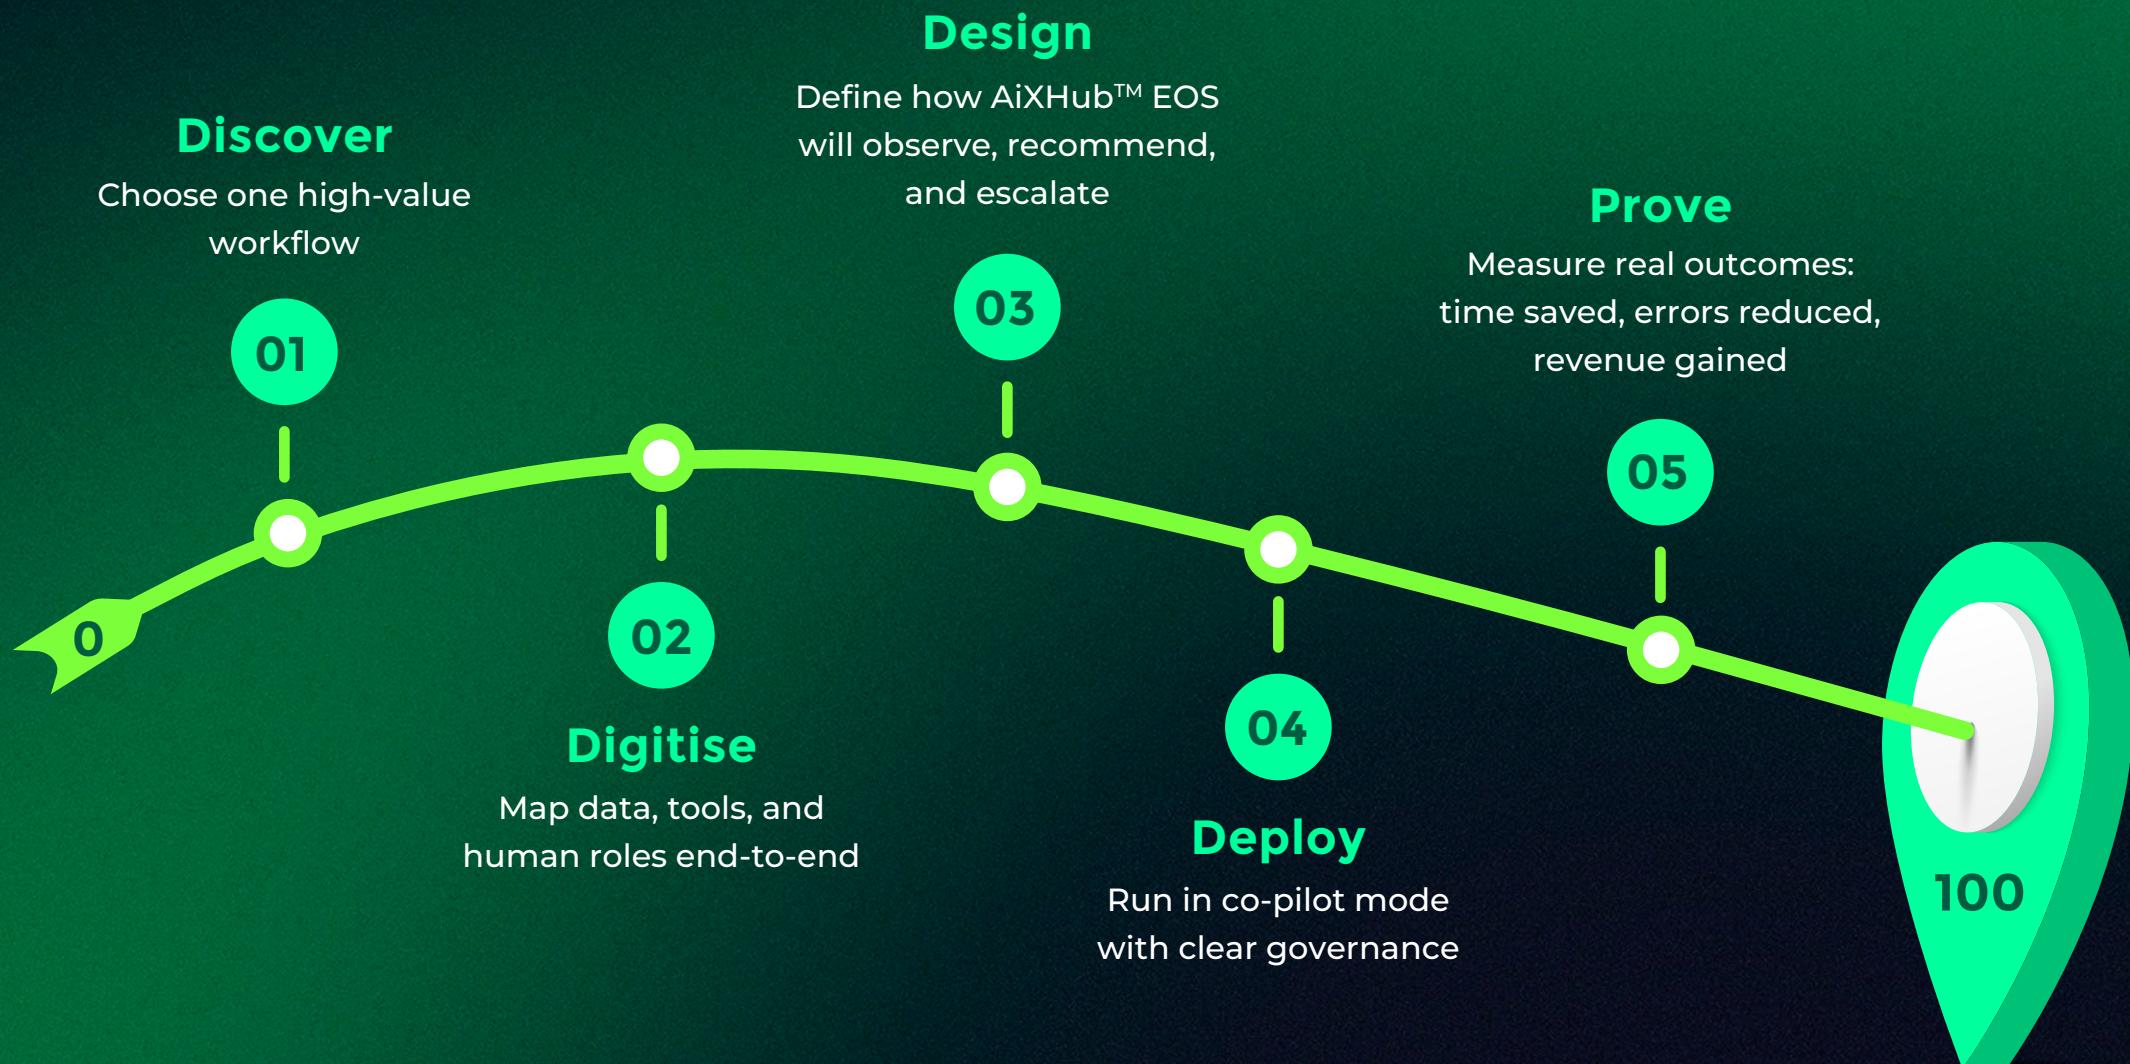

Michael: The Underwriter (Finance/Underwriting)

- Overwhelmed by hundreds of pages, high stakes decisions
- AiXHub™ EOS provided scenario views, risk assessments, audit trails
- Decisive, explainable, governed underwriting
- Outcome: Enhanced human judgment, faster and clearer decisions

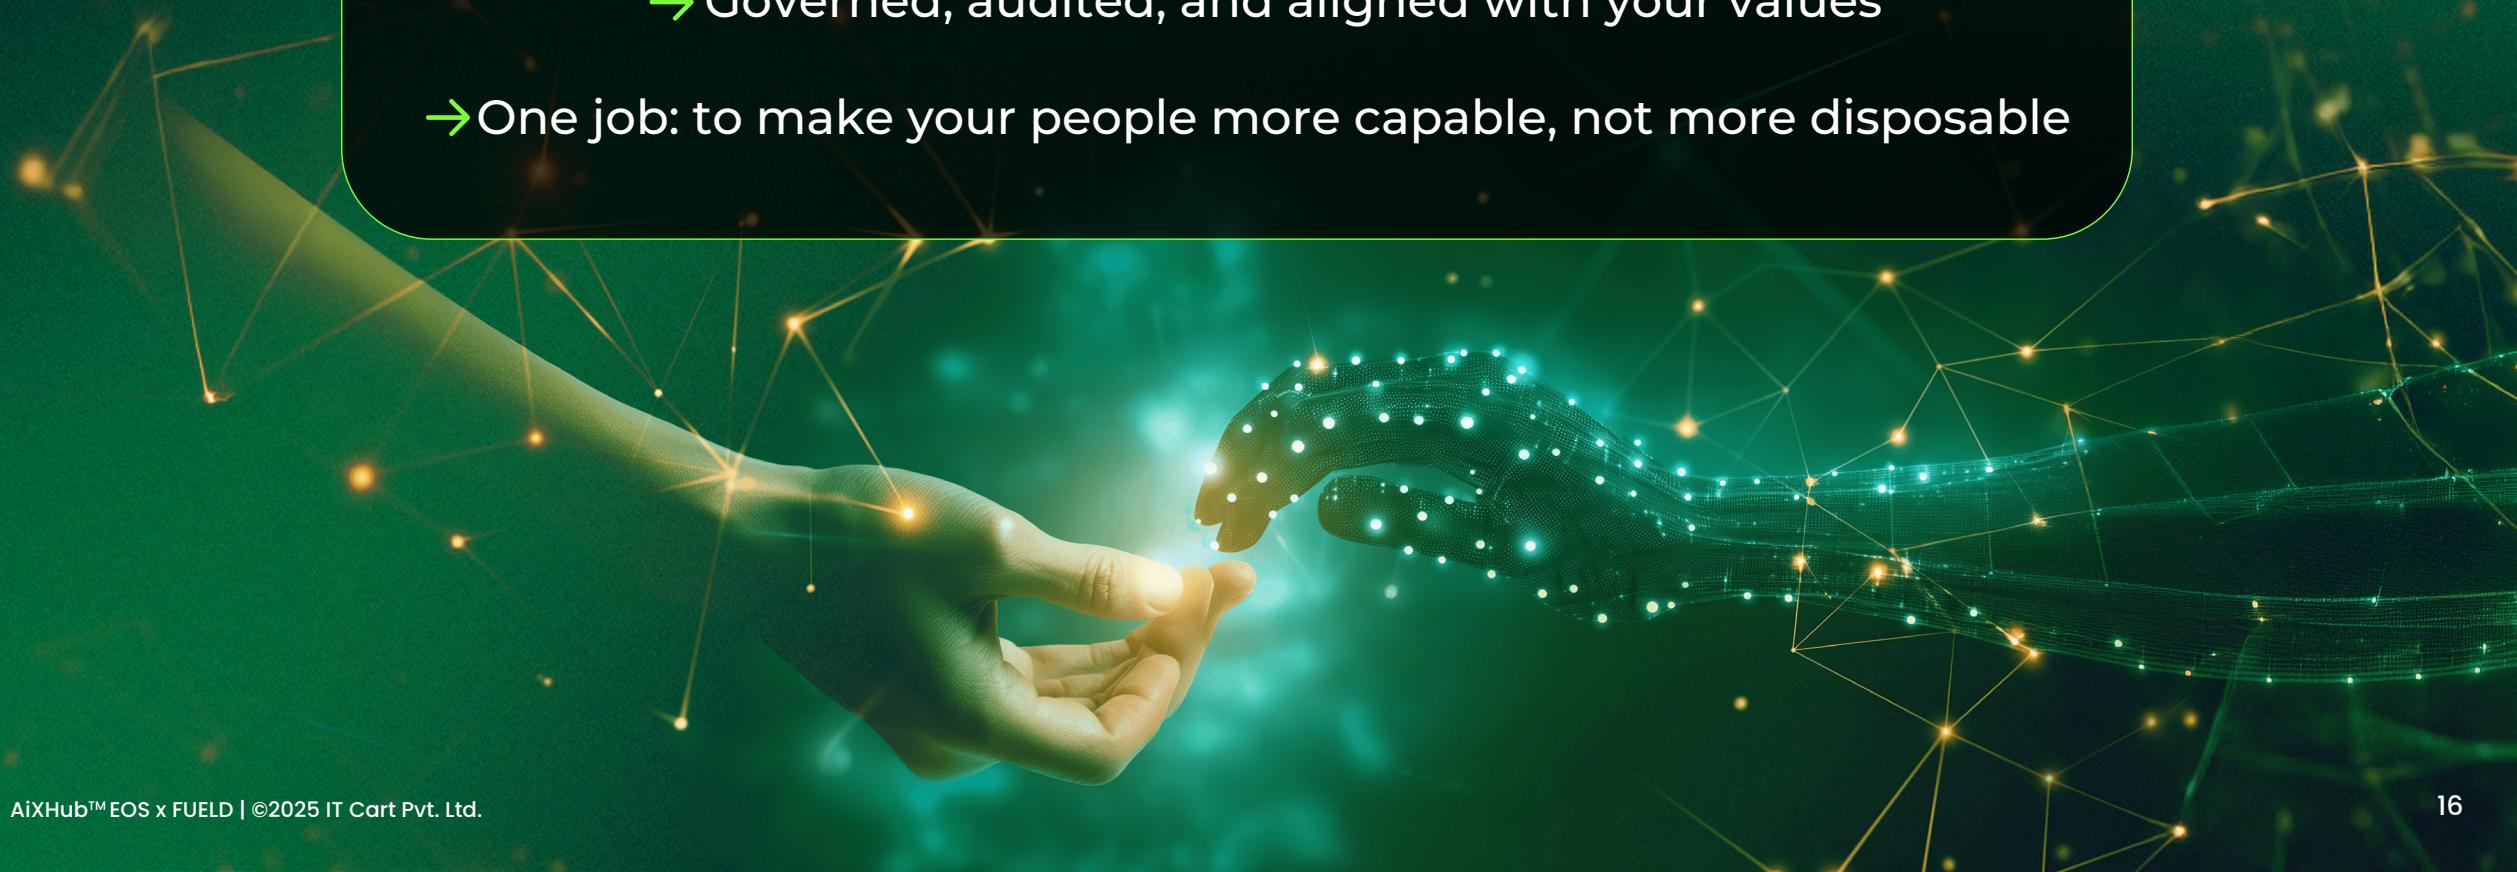

How to Begin: A 100-Day AI-Native Journey

From Co-Workers to Co-Bots: What Does It Feel Like?

- AI that shows up every day as a colleague
- Governed, audited, and aligned with your values
- One job: to make your people more capable, not more disposable

What Great AI-Native Leaders Ask?

Where is **intelligence trapped** in your organisation but not used?

01

If you adopted an AI-Native EOS, **where would you start** in 100 days?

03

02

Which decisions are your people making manually that **AI could safely assist**?

04

How will you **govern AI** – not just buy it?

*AI will not build the future for us.
But it can **build the future with us**
if we learn how to work with it.*

Not just a theory. It's already happening across industries

AiXHub™ EOS: The Intelligence Layer Across Industries

One Core Infinite Solutions

Questions & Reflections

*These journeys speak for themselves
now I'm eager to understand yours.*

Thank you!
